Re: Normal Value Review

Vancouver Island Farm Products Inc. is a licensed agency of the British Columbia Vegetable Marketing Commission (the "BCVMC"). We are aware that the BCVMC has made a submission on 22 January 2025 to request that the Canada Border Services Agency (the "CBSA") initiate an immediate re-investigation of the normal values and export prices of certain whole potatoes, originating in or exported from the United States of America (the "USA"), for use and consumption in the Province of British Columbia ("BC"). This submission was made on behalf of the various agencies and all potato producers in BC.

Vancouver Island Farm Products Inc. acts as the marketing agency for the following two potato producers in the province of British Columbia:

- **Lazo-Tyee Farms**
- **Cowichan Bay Produce**

Vancouver Island Farm Products Inc. has reviewed the submission and agrees that a re-investigation of the normal values and export prices is overdue and ought to be undertaken by the CBSA as soon as possible. We also support the request that retroactive duties ought to be assessed for past importations and that this would be appropriate for all the circumstances provided.
