
Who we are

MMG was founded in 2009 and mines for progress, creating wealth for our people, host communities and shareholders. We work in complex jurisdictions with communities who have vastly differing experiences with resource development. A long-term outlook, our pride in mining, our commitment to international standards and our respect for people, land and culture underpin our success.

COMPANY OVERVIEW

We mine for progress

Our Business

MMG has corporate offices in Melbourne, Australia, Beijing and Hong Kong, China – is a mid-tier, global producer of base metals including copper and zinc, operating across Australia, Botswana, the Democratic Republic of the Congo and Peru.

We are listed on the Hong Kong Stock Exchange (HKEx:1208) with an international shareholder base.

[OUR BUSINESS](#)

Our Vision and Values

Our vision is to create a leading international mining company for a low carbon future. Our five core values underpin our culture.

Khoemacau overview

Khoemacau is a long-life copper silver mine located in one of the most prospective mining regions in Africa, the Kalahari Copper Belt in Botswana.

MMG announced its decision to acquire the asset in November 2023, completing the transaction in March 2024.

In June 2021, Khoemacau completed construction of its low cost, c.60ktpa copper and c.1.6Mozpa silver metal in concentrate at full run rate. It completed ramp up of current operations to full production in Q4 2022. Khoemacau’s annual production is expected to be around 43,000 and 53,000 tonnes of copper in copper concentrate.

Ore at Khoemacau is mined from underground using the longhole stoping method and transported by truck on a 35km purpose-built bitumen haul road to the Boseto processing plant. The copper concentrate is then transported by road to port and shipped to customers globally.

Drilling of and studies on its expansion project forecast a potential increase production to over 130ktpa copper and 5Mozpa silver (average run rate at full production) to unlock the full potential of its prized position in the emerging Kalahari Copper Belt.

Khoemacau employs around 1800 people with 95% local employment from Botswana and has an estimated mine life of 20+ years.

Kinsevere: Beyond Mining

The mine was acquired by MMG in 2012 and has been in operation since 2007. A leasehold agreement is in place with Gécamines.

With a mine life of three plus years, the operation produces copper cathode through conventional mining methods.

The copper is extracted from an open pit, with ground conditions allowing most areas to be mined without blasting. Following plant and grinding mill processing, acid-leaching, solvent extraction and electrowinning is used to plate the copper.

Through a focus on operational excellence, Kinsevere continues to deliver production capacity of 63,000 and 69,000 tonnes of copper cathode per annum.

More information can be found in Kinsevere's Mineral Resources and Ore Reserves report and in Quarterly Production Reports.

More than half of Kinsevere's senior management are Congolese and nearly all the 800 full time positions are filled by local DRC people. Kinsevere also creates over 3,000 jobs for contractors and communities at peak, further boosting local job opportunities.

Community Engagement

Kinsevere continues to develop positive relationships, bringing community development programs and sustainable improvements to the lives of people in villages surrounding the mine. To date, Kinsevere’s long term community investment totals nearly US\$20 million.

On 6 June 2021, Kinsevere signed the ‘Cahier de Charge’ with the local community, sponsoring a series of social development programs, pledging US\$6 million to assist local villages for the next five years.

Kinsevere’s community consultation approach aligns with regional priorities and the United Nations Sustainable Development Goals.

Current initiatives are focused on:

- Supporting agricultural development and increasing food security;
- Achieving measurable improvements in health and education; and
- Establishing self-sustaining local businesses and improving public infrastructure.

Rosebery

Rosebery is an underground polymetallic base metal mine located in the township of Rosebery in Tasmania, Australia.

CONTINUE READING

[Home](#) / [Our Business](#) / [Rosebery](#)

MMG Rosebery - About the Mine

Rosebery is approximately 300 kilometres north-west of Hobart and 125 kilometres south of Burnie. Rosebery is 100% owned by MMG Limited and has been operating continually for over 85 years, with operations starting in 1936. Zinc, copper and lead concentrates, as well as gold doré, are produced at Rosebery using mechanised underground mining method followed by crushing, grinding and floatation processes.

Concentrates are then transported by rail to the Port of Burnie where they are shipped in bulk carriers to smelters in Hobart and Port Pirie. Gold doré bars are sold to a refinery in Australia where they are refined into gold bullion.

Annual production at Rosebery is expected to be around 50,000 – 60,000 tonnes of zinc in zinc concentrate. The operation continues to deliver excellent operational performance that saw 2018 deliver record levels for mining, milling, zinc equivalent production and payable metal in product sold.

More information about our ore reserves can be found in our Mineral Resources and Ore Reserves report, and in our Quarterly Production Reports.

The operation employs around 500 employees and contractors on a local residential basis. Approximately 98% of the employees on site are Australian nationals. The majority of Rosebery Mine employees are Tasmanian, with a significant number living on the West Coast.

The future of Rosebery

MMG is proud to be part of Rosebery and the rich history of the West Coast. In recent years, we have invested significantly in exploration, and are pleased to have identified the underground ore bodies that will continue Rosebery's legacy for the benefit of a new generation of Tasmanians.

An extended life of mine will mean the protection of regional jobs, and a continued economic contribution to Tasmania and the local region.

Las Bambas

Las Bambas is a large, long-life copper mine located in Cotabambas in the Apurimac region of southern Peru.

[CONTINUE READING](#)

[Home](#) / [Our Business](#) / **Las Bambas**

Las Bambas summary 2019

Las Bambas is a joint venture project between the operator MMG (62.5%), a wholly owned subsidiary of Guoxin International Investment Co. Ltd (22.5%) and CITIC Metal Co. Ltd (15.0%).

With an estimated mine life of 18 plus years, the operation produces copper concentrate, with by-products of gold and silver, as well as molybdenum concentrate through conventional processing methods.

Ore at Las Bambas is mined from an open pit. The ore is crushed and transported on a 5.5-kilometre overland conveyor to a conventional flotation plant where copper concentrate is produced, then to a molybdenum plant for further processing. Concentrate is then transported by truck and rail to the Port of Matarani in the Arequipa region, where it is shipped to customers worldwide.

After a successful commissioning of the operation, Las Bambas commercial production got underway on 1 July 2016. It is one of the world's largest copper mines, with an annual nameplate throughput capacity of 51.1 million tonnes and annual production is expected to be around 280,000 to 320,000 tonnes of copper in copper concentrate.

Las Bambas' contribution from taxes and royalties exceeded US\$193 million. More than 6,000 direct and indirect jobs were created, benefitting 25 per cent of residents from the Apurímac region.

More information about Las Bambas' ore reserves can be found in the Mineral Resources, Ore Reserves and Quarterly Production Reports.

Las Bambas' operation will position Peru as one of the top global copper producers, and a strong contributor to social investment and regional employment.

Visit the [Las Bambas website](#) for further information on the operation.

Community Engagement

Las Bambas seeks to build long-term relationships with its stakeholders, promoting community development in conjunction with the Peruvian State. Communication methods include face-to-face meetings, workshops, print and audio-visual media, online platforms and open events.

Las Bambas has a large community development team as well as permanent information offices in seven communities throughout the Apurimac and Cusco regions. Residents can visit these offices for information about the operation, submit complaints or enquire about employment opportunities.

MMG company overview 2024

Our Story

Founded in 2009, MMG’s vision is to create a leading international mining company for a low carbon future. We mine to create wealth for our people, host communities and shareholders with an ambition to grow and diversify our resource, production and value, by leveraging Chinese and International expertise.

We are guided by our [Code of Conduct](#) and our values of thinking safety first, respecting each other, working together, doing what we say and wanting to be better.

We are committed to responsible environmental and social performance and effective governance of our operations.

We operate and develop copper, zinc and other base metals projects across Australia, Botswana, the Democratic Republic of the Congo and Peru.

MMG has corporate offices in Melbourne, Australia, Beijing and Hong Kong, China we are listed on the Hong Kong Stock Exchange (HKEx 1208) with an international shareholder base.

A long-term outlook, our pride in mining, our commitment to shared international standards and our respect for people, land and culture underpins our success.

We are MMG and we mine for progress.

Our Major Shareholder

MMG's major shareholder is China Minmetals Corporation (CMC). Founded in 1950, CMC is one of China's major multinational state-owned enterprises. It is a major international organisation involved in the development, production, trading and integrated services of metals and minerals, in addition to its finance, real estate and logistics divisions/businesses.

CMC's subsidiary China Minmetals H.K. (Holdings) Limited (Minmetals HK) currently owns approximately 67.49% of the total shares of MMG, with the remaining 32.51% owned by public shareholders including global resources and investment funds.

The advantages of our Chinese Partnership

The stability, size and insights of [China Minmetals Corporation](#) provides a competitive advantage for our company.

As a major metals and minerals company, China Minmetals Corporation provides a unique insight into global commodity demand. Our relationship allows MMG to draw upon networks and extensive distribution and marketing channels in China's base metals market.

In an industry where lead times can extend for years and even decades, China Minmetals Corporation brings a solid financial foundation, balance sheet flexibility, access to Chinese financial institutions and a long-term investment view. And, as a significant miner and commodity trader, China Minmetals Corporation brings the benefit of technical skills and cross-cultural awareness.

Above all, it is a relationship supported by trust and confidence. Our international leadership team has the delegated authority from its Board to manage day-to-day operations in line with best practice.

We believe this relationship gives us the best of all worlds.

Our History

Our company, MMG Limited, was originally known as 'Minerals and Metals Group'.

Minerals and Metals Group was formed in June 2009 following the purchase of the majority of assets of OZ Minerals Limited (OZ Minerals) by China Minmetals Corporation (CMC) through its subsidiary China Minmetals Non-ferrous Metals Co. Ltd (CMN).

In December 2010, Minerals and Metals Group was acquired by Minmetals Resources Limited, a subsidiary of CMC, that was listed on The Stock Exchange of Hong Kong Limited (Stock Code: 1208).

In September 2012, the company changed its registered English company name from Minmetals Resources Limited to MMG Limited to align the assets already operating as 'MMG' with the registered company name.

MMG completed a secondary listing on the Australian Securities Exchange (ASX) in December 2015. MMG securities was listed on the ASX through Chess Depository Instruments (CDI) under the ticker code 'MMG'. On 4 December 2019 MMG Limited was formally delisted and ceased trading shares on the ASX.

Timeline

July 1988

Minmetals Resources Limited (Minmetals Resources) is incorporated in Hong Kong. Its focus is commodities trading and fabrication.

June 2009

Minerals and Metals Group is formed.

Minerals and Metals Group is formed following CMC's acquisition of the majority of OZ Minerals' assets through CMC's subsidiary CMN. This included the Century, Golden Grove, Rosebery and Sepon mines; the Dugald River and Izok Corridor development projects; and a range of exploration tenements. MMG is 100% owned by CMN.

April 2011

Minmetals Resources issues 762,612,000 ordinary shares to independent third parties and 1,560,000,000 ordinary shares to CMN following the conversion by CMN Of perpetual subordinated convertible securities (PSCS).

March 2012

Minmetals Resources acquires Anvil Mining Limited which includes the Kinsevere mine and Mutoshi development project in the Democratic Republic of the Congo (DRC).

August 2014

MMG Ltd, Guoxin International Investment Corporation. Limited and CITIC Metal Co., Ltd purchase the Las Bambas project from Glencore plc.

December 1994

Minmetals Resources is listed on The Stock Exchange of Hong Kong Limited under Stock Code 1208.

December 2010

Minmetals Resources, a subsidiary of CMC, acquires Minerals and Metals Group. Approximately 72% shares of shares in Minmetals Resources are owned by CMN, and 28% are owned by the public.

September 2011

Minmetals Resources conditionally divests the trading, fabrication and downstream businesses to CMN in order to focus on its upstream base metals' assets. The divested assets, predominantly located in China, included Minmetals Aluminium Co. Ltd., North China Aluminium Co. Ltd., North China Aluminium Co. Ltd., Yingkou Orienment Plica Tube Company Limited and Changzhou Jinyuan Copper Co., Ltd. and their respective subsidiaries. The sales of Minmetals Aluminium Co. Ltd., and North China Aluminium Co. Ltd. were completed in December 2011 and the sales of Yingkou Orienment and Changzhou Jinyuan were completed in May 2012.

September 2012

The company changes its registered English company name from Minmetals Resources Limited to MMG Limited.

2016

80th Anniversary of MMG Rosebery. Las Bambas commercial production achieved.

2018

MMG completed the sale of Sepon/Lane Xang Minerals to Chifeng.

2019

De-listed from ASX but maintains its primary listing of shares under the stock code of 1208 on The Stock Exchange of Hong Kong Limited.

2024

MMG completes the acquisition of the Khoemacau Mine in Botswana.

December 2015

MMG completed a secondary listing on the Australian Securities Exchange (ASX). MMG securities are listed on the ASX through Chess Depository Instruments (CDI) under the ticker code 'MMG'.

2017

Successful commissioning of the Dugald River project was achieved, with the first production of finished zinc concentrate shipment made.

2018

Rosebery sets a million-tonne record.

2022

Board approved commencement of the Kinsevere Expansion Project.
