Re: Statement of Application Letter for a Scope Ruling on Insulated and Vacuum Insulated OCTG Tubing ("IT/VIT") in reference to Measures in Force of OCTG 1 and Seamless casing.

Dear Sir/Madam,

Western Alliance Tubulars Ltd. ("WAT") is an Indigenous Company with Moosomin First Nation (signatory to Treaty 6) being a major shareholder. WAT has an active operating interest and 49% share option in Victoria International Tubular Corporation ("VIT"), an energy pipe processing facility located in Edmonton, Alberta.

Our facility is the only **independent** pipe processing facility north of Houston Texas that is API5CT certified and has the capability to upset, heat treat, and thread Oil Country Tubular Goods ("OCTG"). Aside from energy tube processing, we also manufacture **Insulated and Vacuum Insulated Tubing** ("IT/VIT") that is used in steam injection and production wells in Steam Assisted Gravity Drainage ("SAGD") operations, Cyclic Steam Stimulation ("CSS") operations, and conventional deep oil wells. In each case IT/VIT replaces bare API5CT casing and tubing.

This application requests a scope ruling for VIT/IT originating in or exported from the Peoples Republic of China and overall scope ruling for the two measures in force being OCTG 1 and Seamless casing.

I, Larry Kryska, Chief Executive Officer, of Western Alliance Tubular Ltd., certify that the information and evidence submitted in the application to the Canada Border Services Agency is true, accurate, and complete.

Yours sincerely,

Larry Kryska,
Chief Executive Officer.
