

## Chapter 73

## ARTICLES OF IRON OR STEEL

**Notes**

1. In this Chapter the expression "cast iron" applies to products obtained by casting in which iron predominates by weight over each of the other elements and which do not comply with the chemical composition of steel as defined in Note 1 (d) to Chapter 72.
2. In this Chapter the word "wire" means hot or cold-formed products of any cross-sectional shape, of which no cross-sectional dimension exceeds 16 mm.

**Statistical Note.**

(NB This note does not form part of the *Customs Tariff* legislation.)

1. For the statistical purposes of classification Nos. 7308.90.00.61 to 7308.90.00.69, storage racking systems refer to an assembly of frames, beams and accessories that, when erected, serves as a free-standing storage structure to support unit loads that can be palletized or not.
2. For the statistical purposes of classification No. 7323.94.00.91, the description "subject to custom duty based on excise duty" means the items classified within this classification number contain an excisable good such as alcohol or tobacco, when being imported
